

Sabya Sachi Roy

B.Sc. in Computer Science and Engineering

📍 Mongla, Khulna, Bangladesh

Profile

I am a passionate full-stack developer with experience in building modern web and mobile applications. I work with Laravel, Livewire, WordPress, REST APIs, Android apps, and custom software with clean UI/UX. I also have strong skills in graphics design and previously worked at Rabi Printing Press.

Over the years, I've completed several Udemmy courses and Industrial Training in Networking, which strengthened my overall technical knowledge. I enjoy creating systems like school management, result modules, and custom CRUD applications that are efficient, user-friendly, and reliable.

My goal is to apply my skills in a professional environment where I can contribute effectively, learn continuously, and deliver high-quality solutions.

Education
